

Snowball Catapult

Materials:

- Popsicle sticks
- Rubber bands
- Small paper cup
- White Pom Poms
- Glue

Directions:

1. Tie 5 popsicle sticks together with two rubber bands (one on each end).

2. Tie two more popsicle sticks together with one rubber band on one end.

3. Separate the untied end of the two popsicle sticks and place one on one side of the five sticks and the other stick on the other side.

4. Use one more rubber band to hold your contraption together. This will secure the split popsicle sticks around the stack of five.

5. Glue the paper cup to the popsicle stick in the air, making sure you leave enough room at the end of the stick for your finger to push it down.
