

2023 Robot Table Set Up Instructions

The National WWII Museum's Robotics Competition uses the same 4ft x 8ft table used in the *FIRST* LEGO Challenge program. The Robotics kits contain the items needed to set up the 2023 Robot Game. Please refer to the information contained in this document as you set up your mat and mission models for the game. Please email any questions to robotics@nationalww2museum.org

Before you begin...

- Find the strip of Dual Lock tape in your kit. Cut the tape into 10 equal pieces. These pieces will be used to secure the right edge of the red fabric to the mat. **Yellow X's mark the locations that Dual Lock should be placed on the mat and where it should be placed on the underside of the red fabric.**
- Locate the two sets of mini sticky notes. One color will be used to represent the ration booklet in the Rationing mission. The other color will represent the war bond stamp in the War Bonds mission.
